

Smokey celebrates his 60th at the Emery and Carbon County Fairs

Moab Bureau of Land Management Fire Division and Manti-LaSal National Forest joined together to host fire prevention booths at the Emery and Carbon County Fairs. Both counties are in very rural settings and are abundant with interface settings. It was an ideal opportunity to spread fire prevention messages.

Both fairs are well attended. Hundreds of adults and children visited the booths. Firewise, Utah Living with Fire, Fire Use Fires, RMP and Smokey Bear

Information was shared with all. Smokey Bear goodies were the highlight for the kids.

The U.S.F.S. handled the arrangements to have Smokey Bear appear and the birthday festivities. The BLM arranged to have

materials and goodies to give to the kids. The BLM Price Field Office also made their draft RMP materials available

Questions about all aspects of fire and fire management were answered by the agency representatives working the booths. The BLM, U.S.F.S. and Utah State Division of Forestry, Fire and State

Land had representatives to help with the booth.
