

Black Cedar Habitat Enhancement Fillmore Ranger District, Fishlake National Forest

Contact Information: Bryce L. Monroe, blmonroe@fs.fed.us
Office# 435-896-1014

Planned Implementation Date: Fall 2014 through spring 2016.

Location: Project located 2.5 miles to the NE of the city of Fillmore, Utah.

Legal Description: Township 21 South, Range 3 West, Sections 7,18,19 and Range 4 West Sections 1,12,13,24.

Project Description: Black Cedar Habitat Enhancement project area encompasses approximately 839 acres that will be mechanically treated by mastication (mulching) and prescribed fire pile burning.

The overlying objective is to maintain an established fuel break by treating Pinyon and Juniper regeneration within an existing chaining. The project area was chained in the 1960's and is currently being encroached upon by the surrounding Pinyon and Juniper woodlands. The project is considered an integral part of the wildland fire suppression and hazardous fuel reduction program. This treatment will also have secondary impacts that may improve the area for wildlife and livestock.
