Wende Wilding, 435-896-1621, [wwilding@fs.fed.us](mailto:wwilding@fs.fed.us)  
Fishlake National Forest Information: 435-896-1623

**Planned Implementation Date:** Starting Winter 2012 - Fall 2013

**Location:** Approximately 6.5 miles to the NE of Holden, Utah.

**Legal Description:** Township 19 South, Range 3 West, Sec 10, 15, 22, 27, 34

**Project Description:** The Ebbs & Wildgoose Habitat Enhancement Project area encompasses approximately 821 acres that will be mechanically treated by mastication (mulching).

The overlaying objective is to maintain an established fuel break by treating Pinyon and Juniper regeneration within an existing chaining. The project area was chained in the 1960's and is currently being encroached upon by the surrounding Pinyon and Juniper woodlands. The project is considered an integral part of the wildland fire suppression and hazardous fuel reduction program. This treatment will also have secondary impacts that may improve the area for wildlife and livestock.
