## Martin Draw Slashing

### Vernal, Utah —

The Green River District of the Bureau of Land Management (BLM) would like to inform the public of a fuels project taking place June 1, 2010 – September 1, 2010. This project will provide for wildland fire hazard reduction by cutting live Pinyon-Juniper trees by hand with chainsaws. Boles of the trees shall be completely severed from the stump(s) within six inches from the ground measured on the uphill side. No live or dead limbs shall be left on the stump of cut trees. The resultant slash may not exceed 3 feet in depth. This project is approximately 246 acres. It is located in Daggett County, Utah, approximately 19 miles east of Dutch John, Utah. Elevations range from 6,000 to 6,300 feet within the project site. The slope within the project ranges from 1-15% over the unit.
