UNITED STATES DEPARTMENT OF INTERIOR
BUREAU OF LAND MANAGEMENT
OFFICE OF FIRE AND AVIATION
3833 S. Development Avenue
Boise, Idaho 83705

January xx, 2013

In Reply Refer to:

Instruction Memorandum No. FA IM-2013 – xx

To: Fire Leadership Team (FLT) and Fire Operations Group (FOG)
From: Assistant Director, Fire and Aviation
Subject: 2013 BLM Standards for Fire Training and Workforce Development

In 2012, the Bureau of Land Management (BLM) Fire and Aviation, Division of Fire Operations, with concurrence from the National Fire Operations Group, tasked the BLM Fire Training Committee to develop, issue, revise and reissue, as necessary, the *BLM Standards for Fire Training and Workforce Development*. This document states, references, or supplements policy for BLM wildland fire training and workforce development program management.

Employees engaged in fire suppression and fire management activities will continue to comply with agency training policies documents.

Suggestions for modification of the publication should be sent to your BLM Fire Training Committee Representative or to the BLM National Fire Training and Workforce Development Program Assistant Manager listed at http://www.blm.gov/nifc/st/en/prog/fire/training/fire_training/general/committee.html.

1 **Chapter 1**
2 **BLM National Fire Training and Workforce Development Program**
3 **Overview**

4 **Document Purpose**

5 The *BLM Standards for Fire Training and Workforce Development* provides wildland fire and
6 aviation training, qualifications, and workforce development program management direction for
7 BLM personnel.

8 For the purpose of this document, the terms wildland fire and fire will be used interchangeably.

9 **Document Scope**

10 The *BLM Standards for Fire Training and Workforce Development* states, references, or
11 supplements policy for BLM fire and fire aviation training, qualifications, and workforce
12 development program management. Original source policy is stated or referenced throughout this
13 document. This document attempts to quote verbatim, rather than to paraphrase, policy that is
14 stated elsewhere and limits duplication of source policy when a reference will suffice. This
15 document is intended to comply with and support the *Review and Update of the 1995 Federal*
16 *Wildland Fire Management Policy (January 2001)*, the *Guidance for Implementation of Federal*
17 *Wildland Fire Management Policy (February 13, 2009)*, the [Interagency Standards for Fire and](#)
18 [Fire Aviation Operations](#) (Red Book), [BLM Training Policy Manual](#) (2006) and other existing
19 federal policy.

20 **Program Mission Statement**

21 The mission of the Bureau of Land Management (BLM) National Fire Training and Workforce
22 Development Program is to develop the wildland firefighting workforce through qualification
23 standards, training standards, and workforce development programs in support of BLM fire
24 management objectives.

25 **Program Objectives**

- 26
- 27 • Provide national leadership in all areas of BLM fire training and workforce development.
 - 28 • Advocate for the professional development of the individual firefighter.
 - 29 • Develop and disseminate a wide range of training and development opportunities for
30 BLM fire personnel.
 - 31 • Ensure that BLM fire training and workforce development supports the overall Bureau
mission.

32 **Fire Training and Workforce Development Doctrine**

33 The purpose of fire training and workforce development is to develop firefighters who can fight
34 fire effectively and safely, and who can manage complex wildland fire programs at the highest
35 levels.

36 Although training is often associated with technical skills and education with professional
37 knowledge, a successful firefighter must excel in both areas, mastering a wide range of technical

1 skills and building a significant body of professional knowledge. An experienced firefighter's
2 skills and knowledge should range from fundamental suppression tactics to complex wildland
3 fire management in challenging interagency environments.

4 All firefighters undergo similar entry-level training. This universal training provides all
5 firefighters with a common background and skill set in the basic components of wildland fire
6 management.

7 Fire training consists of curriculum-driven classroom studies; on-the-job training; individual and
8 group workforce exchanges; formal and informal crew-level training; and knowledge and skills
9 gained through experience.

10 The formal training curriculum covers the entire field of wildland fire, from basic suppression to
11 management of large and complex fires. Fire and aviation operations, fire behavior and effects,
12 risk management, leadership, logistics, planning, finance, and other subjects are part of the fire
13 training curriculum.

14 On-the-job training is formally integrated into the fire training curriculum. Lessons learned in
15 controlled classroom settings are practically applied in uncontrolled fire environments where
16 performance is evaluated and documented by mentors.

17 Crew level training is a critical component of effective wildland fire management. Crews train
18 through the established curriculum, but also in many other ways, formal and informal. Every
19 activity, from routine daily work to complex fire suppression operations, is a training
20 opportunity; professional crews train and learn incessantly. The continuous training environment
21 established by top crews amplifies the knowledge gained through experience.

22 Experience is the most critical aspect of fire training. A firefighter gains experience over time
23 across a wide range of wildland fire environments and situations. Experience is enhanced as a
24 training opportunity when it is critically reviewed and analyzed, even after success. After action
25 reviews, tailgate meetings, and accident investigations are all methods for evaluating recent
26 experience and identifying opportunities to improve. Self-improvement is critical to the
27 development of the professional firefighter.

28 Successful fire training and workforce development will develop the highly trained, skilled, and
29 experienced firefighters and leaders essential to the future success of the BLM fire program.

30 **Policy**

31 Firefighters must meet standards identified in the *Wildland Fire Qualifications System Guide*,
32 *Publication Management System (PMS) 310-1* (PMS 310-1). The PMS 310-1 may be found at
33 <http://www.nwcg.gov/pms/docs/docs.htm>.

34 Certain fire management positions must meet standards identified in the *Interagency Fire*
35 *Program Management Qualifications Standards and Guide*, which is available online at
36 <http://www.ifpm.nifc.gov>.

1 Employees engaged in fire management activities will comply with all agency-specific training,
2 qualifications, and health and safety policy. BLM standards for training and qualifications may
3 exceed the minimum standards established by National Wildfire Coordinating Group (NWCG).
4 Additional standards will be approved by the Assistant Director, Fire and Aviation, and
5 implemented through the Incident Qualifications and Certification System (IQCS). Standards
6 that exceed the minimum standards established by NWCG are identified in this document.

7 NWCG-developed direction, if adopted, will be issued as BLM-specific direction, as stated in
8 Department Manual Part 620, Chapter 1.2, Section G:

9 *“National Wildfire Coordinating Group (NWCG) is comprised of federal and state*
10 *representatives from governmental organizations with wildland fire management*
11 *responsibilities...NWCG is a forum for development of recommended policies, guidelines*
12 *and standards that can be of benefit to participating bureaus. Policies, guidelines or*
13 *standards, if adopted by a bureau, are implemented through individual bureau directive*
14 *systems.”*

Review, Updates, Request for Change

16 The *BLM Standards for Fire Training and Workforce Development* will be updated annually.
17 Proposed changes and updates to this document will be managed through the BLM Fire Training
18 Committee Request for Change Process.

BLM Fire Training Committee Request for Change Process

19 All suggestions for modification to this document should be sent through the appropriate State
20 BLM Fire Training Committee (BFTC) Representative via a BLM Fire Training Committee
21 Request for Change form (see [Appendix A](#)). The Request for Change Process is used to
22 recommend:
23

- 24 • Changes to or creation of BLM training courses;
- 25 • Changes to or creation of BLM position qualifications, including IQCS
26 recommendations;
- 27 • Changes to BLM training policy; or
- 28 • Development of new training products or workforce development programs.

29 BFTC representatives should address requests with state-level stakeholders and develop a
30 consolidated state position. Requests should then be submitted to the BLM Fire Training
31 Committee chair.

32 All requests for change will be processed through BFTC conference calls or meetings and
33 tracked through the BFTC Action Item Log. Some decisions may require coordination with other
34 BLM committees and/or groups.

35 Once a decision has been reached, the BFTC will forward the request to the BLM Fire
36 Operations Group (FOG) for consideration. The FA-324 BFTC co-chair will inform committee
37 representatives of final decisions and if any further action(s) is needed.

- 1 Changes adopted through this process will be incorporated into the *BLM Standards for Fire*
- 2 *Training and Workforce Development* during the annual revision or through erratum.

1 **Chapter 2**
2 **BLM National Fire Training and Workforce Development Program**
3 **Organization and Responsibilities**

4 **Introduction**

5 The BLM National Fire Training and Workforce Development Program is made up of personnel
6 and groups with roles and responsibilities for programs located at the national, State, and local
7 levels.

8 **National Organization and Responsibilities**

9 **Fire and Aviation Assistant Director (NIFC)**

- 10 • Establish BLM policy for fire training and qualifications.
11 • Develop, implement, and evaluate Bureau fire training and workforce development
12 programs.
13 • Advise the Director on fire program training and workforce development issues.
14 • Provide fire training assistance and expertise to BLM and interagency partners.
15 • Assure compliance with statutory and regulatory requirements and internal program
16 standards.

17 **Chief Preparedness/Suppression Standards (NIFC)**

- 18 • Supervise the BLM National Fire Training and Workforce Development Program.
19 • Establish uniform processes involving the BLM Fire Training Committee (BFTC), Fire
20 Operations Group (FOG), and Fire Leadership Team (FLT) to develop, issue, implement,
21 evaluate, enforce, revise, and reissue fire training and workforce development direction.
22 • Ensure that fire training and workforce development direction and materials are
23 consistent with Bureau policies, objectives, and regulations.
24 • Assure validity and relevance of course materials and instructional methodology.
25 • Coordinate and integrate fire training efforts with interagency partners.

26 **BLM National Fire Training and Workforce Development Program Manager (NIFC)**

- 27 • Manage the BLM National Fire Training and Workforce Development Program.
28 • Provide leadership and technical expertise to Bureau fire programs and interagency
29 partners in all areas of fire training and workforce development, including training
30 systems design, standards development, curriculum development, course delivery,
31 publications management, and qualifications standards.
32 • Develop and implement long-term strategies for continual evaluation and progressive
33 modification of Bureau fire training and workforce development program in order to keep
34 pace with developments and innovations in the field of training and education.
35 • Provide leadership and oversight to Bureau and interagency training and workforce
36 development programs and initiatives such as higher education programs and workforce
37 mentoring program.
38 • Evaluate and adjust fire training and workforce development programs to achieve
39 established objectives in the most cost effective manner possible.

BLM National Fire Training and Workforce Development Program (NIFC, FA-324)

The BLM National Fire Training and Workforce Development Program (NIFC, FA-324) functions under the direction of the Chief Preparedness/Suppression Standards. FA-324 is made up of a Program Manager, an Assistant Manager, and a Writer/Editor who provide overall support for the BLM National Fire Training and Workforce Development Program.

Website: http://www.blm.gov/nifc/st/en/prog/fire/training/fire_training.html

Fire Operations Group (FOG)

The FOG is chartered under the Fire Leadership Team (FLT) and in collaboration with the BLM Fire and Aviation, Fire Operations (FA-300) and is made up of State Fire Operation Specialists. This group's primary purpose is to promote and coordinate safe, effective and efficient fire operations in order to accomplish BLM fire management objectives.

Website: http://web.blm.gov/internal/fire/fire_ops/fog.htm

BLM Fire Training Committee (BFTC)

The BFTC is chartered under the FOG. The mission of the BFTC is to provide national leadership in all areas of BLM fire training and workforce development and to promote and coordinate safe, effective, and efficient training in order to accomplish BLM fire management objectives. This is done in collaboration with and under the direction of the FOG in coordination with the BLM National Fire Training and Workforce Development Program Manager (NIFC).

Each BLM state will provide one representative to the BFTC. The representative should be familiar with and may have primary responsibility for fire training issues at the organizational level.

The BFTC is chaired jointly. One co-chair will be appointed from FA-324 by the FA-320 Chief, and the other will be nominated from and elected by the BFTC for a two-year term.

Website: http://www.blm.gov/nifc/st/en/prog/fire/training/fire_training/general/committee.html

BLM National Training Center (NTC)

The National Training Center's mission is to sustain the health and productivity of the public lands through education and training. NTC offers courses annually making it a primary source for BLM training in natural resources and leadership. NTC is a leader in instructional television and produces courses that are broadcast via satellite nationally.

The BLM National Fire Training and Workforce Development Program (NIFC, FA-324) and NTC have a Memorandum of Understanding (MOU) outlining working relationships, liaisons, and responsibilities.

Website: <http://www.blm.gov/ntc/st/en.html>

BLM Representative: NTC Fire Training Coordinator under the Branch of Renewable Resources & Planning

State and Geographic Organization and Responsibilities

State Directors

- Provide statewide leadership in fire training and workforce development.
- Ensure that state fire or fire militia employees meet applicable fire training requirements established in this document, the *Interagency Standards for Fire and Fire Aviation Operations* (http://www.nifc.gov/policies/pol_intgncy_guides.html), and the *Interagency Fire Program Management Qualifications Standards and Guide* (<http://ifpm.nifc.gov/>).
- Ensure statewide capability to delegate fire management duties to principal acting by accomplishing required training such as M-581, Fire Program Leadership and Fire Management Leadership (FML).
- Support local, geographic, and national training efforts by providing instructors, coordinators, and subject matter experts for course development/revision.

State Fire Management Officer

- Provide leadership in fire training and workforce development.
- Ensure that fire or fire militia employees meet applicable fire training requirements established in this document, the *Interagency Standards for Fire and Fire Aviation Operations* (http://www.nifc.gov/policies/pol_intgncy_guides.html), and the *Interagency Fire Program Management Qualifications Standards and Guide* (<http://ifpm.nifc.gov/>), prior to performing fire management duties.
- Maintain fire training and qualifications records.
- Evaluate fire training and workforce development needs to meet current and anticipated needs.

State Fire Training Officers

All states have a designated State Fire Training Officer position; however, this may be assigned as collateral duty by some states.

- Provide statewide leadership in fire training and workforce development.
- Assist the State Director, State FMO, and unit fire program managers in meeting all fire training and workforce development requirements.
- Represent the state on the BFTC and help that group meet its national fire training objectives.
- Represent the state and the BLM on the Geographic Area Training Committee.
- Coordinate fire training efforts with state counterparts in operations, aviation, and fuels.
- Serve as the State IQCS account manager and coordinator.
- Work with the unit fire programs to provide subject matter experts and field reviewers for BLM and NWCG course development projects.
- Meet established fire training documentation and reporting requirements.
- Assist unit fire programs in complying with Interagency Fire Program Management (IFPM) standards.
- Coordinate and prioritize statewide NWCG fire training course nominations.
- Assist unit fire programs in identifying and facilitating on-the-job training opportunities.
- Provide leadership in the individual development plan process and mentoring programs.

Geographic Area Training Committees/Working Teams

Geographic area training committees/working teams are chartered under their respective geographic area coordinating groups or boards of authority. Their purpose is to provide coordinated, interagency training programs within their geographic areas. Charters and detailed information pertaining to the geographic area training committees/working teams can be found on the National Wildland Fire Training website (<http://www.nationalfiretraining.net/>).

Geographic Area Training Representatives (GATRs)

Representatives are interagency regional training center managers or individuals who are responsible for scheduling, coordinating, delivering, and evaluating 300-400 level NWCG courses within their geographic area.

This group is responsible for organizing, coordinating, and managing geographic area or national training programs in the various geographic areas. Information and recommendations associated with training implementation and evaluation will be passed on to the NWCG Operations and Workforce Development Committee (OWDC). The group also helps to set regional/geographic area nomination priorities and course content for interagency training.

Website: http://www.nationalfiretraining.net/GATR_information.html

Local Organization and Responsibilities

District Managers

- Provide districtwide leadership in fire training and workforce development.
- Ensure that district fire or fire militia employees meet applicable fire training requirements established in this document, the *Interagency Standards for Fire and Fire Aviation Operations* (http://www.nifc.gov/policies/pol_intgncy_guides.html), and the *Interagency Fire Program Management Qualifications Standards and Guide* (<http://ifpm.nifc.gov/>).
- Ensure capability to delegate fire management duties to principal acting by accomplishing required training such as Fire Program Leadership (M-581) and Fire Management Leadership (FML).
- Support local, geographic, and national training efforts by providing instructors, coordinators, and subject matter experts for course development/revision.
- Establish and implement fire training and workforce development plans to meet established fire management objectives of the annual work plan.

Unit Fire Management Officers (FMO)

- Provide leadership in fire training and workforce development.
- Ensure that fire or fire militia employees meet applicable fire training requirements established in this document, the *Interagency Standards for Fire and Fire Aviation Operations* (http://www.nifc.gov/policies/pol_intgncy_guides.html) and the *Interagency Fire Program Management Qualifications Standards and Guide* (<http://ifpm.nifc.gov/>) prior to performing fire management duties.
- Maintain fire training and qualifications records.
- Evaluate fire training and workforce development needs to meet current and anticipated needs.

Unit-Level Training Officers

All units have designated fire training officers; this is usually a collateral duty.

- Provide unit-level leadership in fire training and workforce development.
- Assist the District Manager and the FMO in all areas of fire training.
- Ensure that employees meet pertinent PMS 310-1 and BLM-specific qualifications requirements.
- Assess unit training needs and establish training objectives. Develop and implement training schedules to meet those objectives.
- Coordinate fire training efforts with interagency partners and non-fire programs.
- Represent the unit on local, zone, or geographic area fire training committees.
- Manage the unit IQCS account, including inputting training and experience information and producing incident qualifications cards (Red Cards).
- Coordinate the fire qualifications review process for the unit IQCS Red Card Review Committee.
- Assist with IFPM standards compliance.
- Coordinate and prioritize unit-level NWCG fire training course nominations.
- Assist employees in identifying and facilitating on-the-job training opportunities.
- Provide leadership in the individual development plan (IDP) process and mentoring programs.
- Assist the FMO in prioritizing training nominations.
- Work with agency and interagency counterparts to sponsor 300-level courses.

Employee Responsibilities

Employees are responsible for their own self-development. While the BLM has a responsibility to ensure that employees are properly trained and equipped to perform their jobs, employees are largely responsible for developing and advancing their own careers. Responsibilities may include:

- Work with immediate supervisor to identify training and development needs.
- Use annual performance plans and/or individual development plans to establish and implement a training and development strategy.
- Participate in and complete training courses and developmental activities.
- Apply knowledge and skills in field situations to gain experience.
- Enhance experience by participating in after action reviews and other activities that assess, analyze, and seek to improve performance.
- Ensure that training and records are accurately entered into IQCS.
- Execute only duties they have been trained and qualified to perform.

Chapter 3

BLM National Workforce Development Programs

Introduction

The BLM National Fire Training and Workforce Development Program is constantly developing and improving programs that will better develop our future firefighters, leaders, and fire managers. This chapter addresses workforce development programs managed at the national level.

Fire and Aviation Mentoring

Fire and Aviation Mentoring is an interagency effort through a web-based platform to facilitate a knowledge sharing network between *learners* (mentees) and *advisors* (mentors) in the wildland fire community. Fire and Aviation Mentoring is a place where individuals can engage in group mentoring or career development mentoring. BLM Fire and Aviation has endorsed the use of this platform.

Website: <https://fam.openmentoring.com>

Directive URL: http://web.blm.gov/internal/fire/Directives/IB2012/FA_IB2012017.pdf

Higher Education Programs

Technical Fire Management (TFM)

The TFM program, offered by the Washington Institute with credits through Humboldt State University, is designed to improve technical proficiency in several areas of fire management. Course subjects include math, statistics, economics, fuels and fire behavior, fire effects, fire and land management, wildland fire presuppression and suppression, and a TFM final project. The TFM program is targeted at fire career and career-conditional employees who seek advancement in fire program management.

Website:

http://www.blm.gov/nifc/st/en/prog/fire/training/fire_training/training_programs/tfm.html

The Memorandum of Understanding (MOU) between the Washington Institute and TFM Advisory Committee is located at

<http://www.blm.gov/style/medialib/blm/nifc/training/pdfs/tfm.Par.77451.File.dat/TFMmou.pdf>.

University of Nevada, Las Vegas (UNLV) GS-401 Education Program

The UNLV program is targeted at fire program management career and career-conditional employees who intend to transition into the GS-0401 series to expand their career opportunities. The program is designed to meet GS-0401 fire management specialist job classification series requirements. Course subjects include life science, modern biology, ecology, conservation biology, plant ecology, field ecology, biogeography, and ecosystem management.

Website:

http://www.blm.gov/nifc/st/en/prog/fire/training/fire_training/training_programs/unlv.html

1 The MOU between the BLM and UNLV is located at
2 <http://www.blm.gov/style/medialib/blm/nifc/training/pdfs/unlv.Par.5538.File.dat/UNLV%20MO>
3 [U-Final_2009.pdf](http://www.blm.gov/style/medialib/blm/nifc/training/pdfs/unlv.Par.5538.File.dat/UNLV%20MO).

4 **Applying for TFM or UNLV**

5 Interested employees need to complete the needed documentation and submit through their BLM
6 State Training Committee Representative. State representatives will then forward a prioritized
7 applicant list the BLM National Fire and Workforce Development Program (NIFC, FA-324) by
8 June 1 of every year.

9 **Other Higher Educational Programs**

10 The National Wildland Fire Training website maintains a partial list of higher educational
11 resources for fire professionals.

12 *Website:*

13 http://www.nationalfiretraining.net/higher_education

14 **Wildland Fire Apprenticeship Program (WFAP)**

15 The Wildland Firefighter Apprentice Program is an educational program designed to enhance
16 and develop future fire and aviation managers. The intent of the program is to take a career-entry
17 firefighter and provide education, training, and paid work experience over a 12- to 48-month
18 period, depending on experience. Upon successful completion of all the requirements of the
19 Apprenticeship Program, the apprentice will reach journey-level status as a wildland firefighter.

20 **Applying for WFAP**

21 Interested employees should visit the WFAP website (<http://www.wfap.net>) and work with their
22 State Training Committee Representative and the WFAP DOI National Coordinator for specific
23 application and funding processes.

24 *Website:* <http://www.wfap.net>

25 *BLM Representative:* DOI National Coordinator /California BLM State Training Representative

26 **Prescribed Fire Training Center (PFTC)**

27 The Prescribed Fire Training Center (PFTC) is a unique program blending maximum field
28 prescribed burning experience with a flexible curriculum of classroom instruction on topics of
29 interest to prescribed fire practitioners. Participants will have the opportunity to complete
30 portions of their NWCG-approved prescribed fire task books under the guidance of invited
31 training specialists.

32 *Website:* <http://www.fws.gov/fire/pftc/>

33 **Applying for PFTC**

34 BLM applicants will apply directly to PFTC. PFTC will forward a list of all BLM applicants to
35 the BLM PFTC Representative, who will send the list to the BLM National Fire Training and
36 Workforce Development Program Assistant Manager and the BFTC State Representatives for
37 state prioritization and funding confirmation. The BLM National Fire Training and Workforce

- 1 Development Program Assistant Manager will submit the confirmed list to the BLM PFTC
- 2 Representative who will finalize the list and forward to PFTC and BFTC members.

Chapter 4

Interagency Fire Training Program Organizations and Processes

Introduction

The BLM National Fire Training and Workforce Development Program functions within and outside of the interagency environment. This chapter provides an oversight of the National Wildland Fire Coordinating Group (NWCG) and the interagency committees under its direction and how the BLM National Fire Training and Workforce Development Program interfaces in the interagency environment.

National Wildfire Coordinating Group (NWCG)

NWCG is made up of the USDA Forest Service; four Department of the Interior (DOI) agencies: Bureau of Land Management (BLM), National Park Service (NPS), Bureau of Indian Affairs (BIA), and the Fish and Wildlife Service (FWS); and State forestry agencies through the National Association of State Foresters. The purpose of NWCG is to coordinate programs of the participating wildland fire management agencies so as to avoid wasteful duplication and to provide a means of constructively working together. Its goal is to provide more effective execution of each agency's fire management program. The group provides a formalized system to agree upon standards of training, equipment, qualifications, and other operational functions.

Website: <http://www.nwcg.gov/>

NWCG Training Branch

The NWCG Training Branch mission is to develop relevant NWCG training in a cost-effective manner to meet the needs of the wildland fire community through professional training packages which provide a solid training foundation and enhanced training experience.

The NWCG Training Branch has responsibility for and management oversight of the NWCG training curriculum through the [NWCG Curriculum Management Plan](#) and [NWCG Course Development/Revision](#) process. The curriculum includes all courses developed under NWCG, whether or not they are numbered courses identified in the [Wildland Fire Qualification System Guide](#), PMS 310-1.

NWCG Wildland Fire Institute (WFI)

In July of 2009, the NWCG Executive Board accepted the recommendations to explore a corporate university concept and subsequently created the Wildland Fire Institute (WFI). As stated in memorandum NWCG #033 2010, WFI will not be a new training group, nor is it intended to physically centralize all training functions. The intent is for an integrated, collaborative network of training groups throughout the wildland fire and aviation community to provide training, education, succession planning, and talent management now and into the future. As stated in memorandum NWCG #011 2012, an implementation plan is now under development.

1 For more information about WFI, refer to the following memorandums:

- 2 • [NWCG # 011-2012](#)
- 3 • [NWCG # 019-2011](#)
- 4 • [NWCG # 033-2010](#)

6 *BLM Representative, WFI Implementation Task Team:* Contact the BLM National Fire Training
7 and Workforce Development Program (NIFC, FA-324)

8 **NWCG Operations and Workforce Development Committee (OWDC)**

9 The NWCG Operations and Workforce Development Committee (OWDC) provides strategic
10 management of operational, qualification, and training standards for NWCG agency members in
11 compliance with the National Incident Management System (NIMS). OWDC is also responsible
12 for developing and coordinating fire management training programs for Federal and State
13 agencies.

14 *Website:* <http://www.nwcg.gov/branches/pre/owdc/index.htm>

15 *BLM Representative:* BLM National Fire Training and Workforce Development Program
16 Manager

17 **NWCG Leadership Subcommittee**

18 The NWCG Leadership Subcommittee administers the Wildland Fire Leadership Development
19 Program (WFLDP). The mission of the program is to promote cultural change in the workforce
20 and to emphasize the vital importance of leadership concepts in the wildland fire service by
21 providing educational and leadership development opportunities. The program focuses on formal
22 curriculum providing leadership skills in training at all stages of an individual's career. The
23 program develops non-traditional leadership development opportunities that allow individuals to
24 strive for a higher performance level as a leader through self-directed continuous learning.

25 Program components include but are not limited to the L-course curriculum, staff rides, tactical
26 decision games, and sand table exercises, Leadership in Cinema, Professional Reading Program,
27 and social media networks including the program website, the Wildland Fire Leadership blog
28 and Facebook.

29 *Website:* <http://www.fireleadership.gov/>

30 *BLM Representative:* BLM National Fire Training and Workforce Development Program
31 Assistant Manager

NWCG Fire Program Qualifications Standards (FPQS) Subcommittee

The Fire Program Qualifications and Standards (FPQS) Subcommittee (formerly known as the Interagency Fire Program Management) is chartered under the NWCG Operations and Workforce Development Committee (OWDC). The purpose of the FPQS Subcommittee is to develop, maintain, and implement Fire Program Management Qualifications Standards (Qualification Standards) for key fire management positions utilized by the Federal land management agencies. The FPQS Subcommittee is primarily responsible for:

- Developing and maintaining the Qualification Standards for key fire program positions.
- Ensuring consistent interagency application of the Qualification Standards.
- Integrating Qualification Standards into agency workforce development and succession planning efforts.
- Establishing and maintaining a process for reporting issues and concerns related to the maintenance of the Qualification Standards.
- Communicating with fire management and human resources management staff on Qualification Standards utilizing the FPQS website, status reports, FAQs and decision papers.
- Coordinating with the IQCS Change Management Board to maintain the qualification requirements for key fire management positions in IQCS for tracking and reporting purposes.
- Coordinating with the interagency classification group on the development and maintenance of interagency standard position descriptions for key fire management positions.
- Collecting data, developing reports and presenting findings to NWCG.

DOI Policy on Qualification Requirements for GS-0401 Fire Program Management

The Office of Personnel Management (OPM) Qualification Standard for the 0401 series includes a “positive” education requirement. OPM has also established the GS-0401 Supplemental Qualification Standard for Fire Program Management. Applicants are responsible for providing documentation or proof that they have met the applicable educational provisions described in the supplemental standard. No applicant may be placed in a position covered by the GS-0401 Supplemental Qualification Standard for Fire Program Management without meeting these requirements.

Training officers must work closely with human resources personnel to ensure that the coursework meets the requirements of the GS-0401 supplemental standard.

The directive *DOI Policy for Qualification Requirements for GS-0401 Fire Program Management* is located at http://www.ifpm.nifc.gov/standard/standard/DOI_PB_07-13.pdf.

Website: <http://www.ifpm.nifc.gov/>.

BLM Representative: BLM National Fire Training and Workforce Development Program Manager

NWCG Incident Qualifications and Certification System (IQCS) Change Management Board

The IQCS Change Management Board is chartered under the OWDC. IQCS is utilized to certify and manage individual qualifications as defined by the NWCG and [PMS 310-1](#). The partnering agencies have selected representatives to participate, review, and make recommendations in development, implementation, and maintenance of IQCS.

More information on BLM IQCS standards and training is contained in [Chapter 5](#).

Website: <http://iqcs.nwcg.gov>

BLM Representative: BLM National Fire Training and Workforce Development Program Assistant Manager

National Advanced Fire and Resource Institute (NAFRI)

The National Advanced Fire and Resource Institute (NAFRI) is responsible for course development and delivery of 500-level NWCG courses and other national training courses as endorsed by NWCG. NAFRI has numerous steering committees that manage course development and delivery.

Website: <http://www.nafri.gov/>

BLM Representative: Contact the BLM National Fire Training and Workforce Development Program Manager

NWCG Curriculum Management Plan

Maintenance responsibilities for the NWCG training curriculum are assigned by course to one of three primary entities/groups:

- NWCG Training Branch
- Steering committees/National Advanced Fire Resource Institute (NAFRI)
- NWCG committees (may be delegated down to their subcommittees or task groups)

Website: <http://training.nwcg.gov/pdfs/Curriculum%20Maintenance%20Plan.pdf>

NWCG Course Development/Revision

The NWCG Training Development Unit solicits annually for subject matter experts (SMEs) and field reviewers on an as-needed basis. Typically, SMEs join the project teams when courses move from the analysis and design phases into the development phase. Email solicitations, including a nomination form, will be sent out through relevant NWCG committees, Geographic Area Training Specialists, and special interest groups when SMEs are needed for courses.

SMEs participate in approximately three one-week workshops conducted over a one-year time period. The initial workshop determines the extent of the revision.

Website: <http://training.nwcg.gov/>

BLM Process for NWCG Course Development SME Application and Field Review

All applications for course development SMEs will be submitted through the State Fire Training Committee Representative. All applications will then be collected by the BLM National Fire Training and Workforce Development Program Manager and forwarded to the NWCG Training Development Unit Leader. All funding for BLM SMEs will be funded by the local unit. Those not selected as SMEs will be expected to be Field Reviewers for the final product.

BLM Equivalency for NWCG Courses

The BLM has determined that the courses listed in the table below are equivalent to the associated NWCG courses. Persons who have successfully completed the identified equivalent course do not need to attend the corresponding NWCG course and should receive credit in IQCS.

NWCG-APPROVED CURRICULUM	APPROVED EQUIVALENT COURSE(S)
Facilitative Instructor (M-410)	National Fire Protection Association, Fire Service Instructor I (NFPA 1041)
Introduction to Fire Effects (RX-310)	Successful completion of Technical Fire Management (TFM)
Human Factors on the Fireline (L-180)	Firefighter Training (S-130, 2004 version). <i>The 2004 version of S-130 incorporated L-180 into the course package.</i>
Driving for the Fire Service (S-216)	Engine Operator (PMS 419)
Leadership and Organizational Development (S-301, obsolete course)	Fireline Leadership (L-380)

NWCG Guidance for Course Equivalency (Field Manager’s Course Guide)

An equivalent course is determined by agency identified “evaluators” to be equal to an NWCG-approved course. Awarding course equivalency is an agency-specific responsibility. Only agencies have the authority to certify their employees meet NWCG training requirements when alternative course offerings are used. Individual agencies will set guidelines for equivalency determination and may grant credit for courses they deem equivalent. Equivalent fire training courses must meet two criteria:

- An evaluation team has determined that the courses are equivalent to courses identified in the NWCG’s approved curriculum, and
- The BLM Process for Evaluating and Establishing Course Equivalency (see below) has been completed.

Website: <http://www.nwcg.gov/pms/training/training.htm>

BLM Process for Evaluating and Establishing Course Equivalency

1. The appropriate State Office (SO) fire management staff or national committee identifies the need for an equivalency analysis of a specific course. The SO fire management staff or national committee can assemble an evaluation team (see Evaluation Team

1 Composition) to conduct the analysis, document their findings, and submit
2 recommendations through agency channels to the BFTC for an equivalency review. If
3 assistance is needed in assembling the appropriate evaluation team it can be requested
4 from the BLM National Fire Training and Workforce Development Program Manager.

- 5 2. If the BFTC and the BLM FOG determines that the equivalent course analysis is
6 sufficient and the proposed course meets the NWCG certified course standards, the BLM
7 Assistant Director, Fire & Aviation shall issue a memorandum stating that the course is
8 equivalent.
- 9 3. The BLM IQCS Agency Lead will issue a course number for the equivalent course and
10 enter it into IQCS with a competency for the NWCG course. The BLM National Fire
11 Training and Workforce Development Program Manager will provide the equivalency
12 information to the OWDC and the GATRs, other agencies and/or the states for
13 information-sharing purposes.

14 The BFTC may utilize analyses conducted by other agencies when making course equivalency
15 determinations.

16 *Evaluation Team Composition*

17 The evaluation team shall be comprised of at least a lead instructor, cadre member, and course
18 developer or subject matter expert for the respective NWCG course. The evaluators shall be
19 individuals who have either been involved within the past three years instructing the course that
20 is being evaluated, and/or who are familiar with the course development and revision process.

21 *Evaluation Methodology for Equivalency*

22 The evaluation team shall consider, at a minimum, the following items when attempting to
23 determine whether or not a course is equivalent to an NWCG course:

- 24 • *Comparison of course objectives.* The learning objectives of the two courses must be
25 thoroughly analyzed and found to be substantially similar, both at the unit level and at the
26 course level.
- 27 • *Comparison of course content.* There should be no omissions of major topics, procedures,
28 or concepts that are contained in the NWCG course.
- 29 • *Testing.* Tests administered to trainees to measure content learned must be similar in
30 terms of information tested, length of test, and percentage required for a passing grade.
- 31 • *Documentation of findings.* The evaluation team shall document its analysis and findings
32 and forward them to the BLM National Fire Training and Workforce Development
33 Program Manager with its recommendation.

34 Equivalent course material may have more, not less, in-depth subject matter content than the
35 NWCG course.

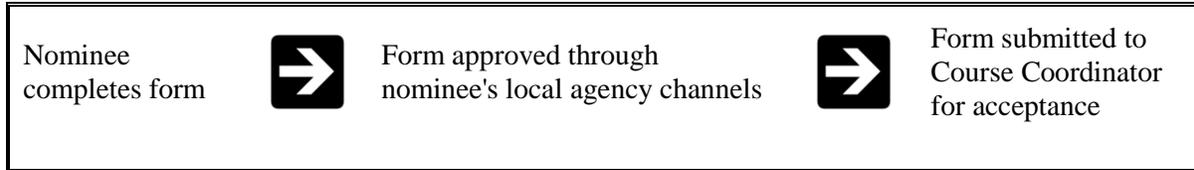

Nomination Process for an NWCG Course

The Unit Training Officer and the employee are responsible for verifying that all agency course and NWCG prerequisites have been met as well as ensuring that all the necessary signatures have been obtained and are on the nomination form.

Website: http://www.nationalfiretraining.net/nomination_forms.html

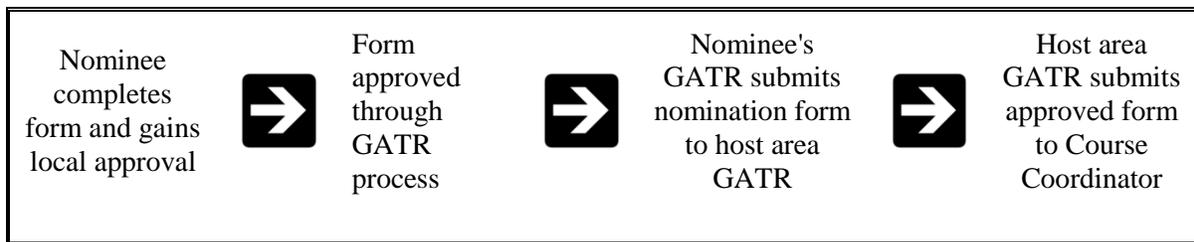

100-200 Level Course Nomination Process

Completed NWCG nomination forms for all 100-200 level courses must be routed as follows:

300-600 Level Course Nomination Process

Completed NWCG nomination forms for all 300-600 level and other miscellaneous courses must be routed as follows:

The above nomination procedures are required for all individuals desiring to attend a course. All geographic areas have agreed to a single point of contact, the GATRs, for the most efficient coordination of courses. This process allows for prioritization and tracking of nominations.

Website: <http://www.nationalfiretraining.net/>

Course Nomination Process Using IQCS

For information on the IQCS nomination process, visit the National Wildland Fire Training website at http://www.nationalfiretraining.net/iqcs_nomination_process.

(This page intentionally left blank.)

Chapter 5

BLM-Specific Fire Training and Qualifications

Introduction

BLM firefighters must meet minimum standards identified in the NWCG *Wildland Fire Qualifications System Guide*, [PMS 310-1](#).

Bureau personnel will meet the training, certification, and qualification processes outlined in the [PMS 310-1](#) and this document. However, the Bureau may place higher standards on training, certification, and qualifications.

Department Manual 620, Chapter 1.2, Section G states:

“National Wildfire Coordinating Group (NWCG) is comprised of federal and state representatives from governmental organizations with wildland fire management responsibilities...NWCG is a forum for development of recommended policies, guidelines and standards that can be of benefit to participating bureaus. Policies, guidelines or standards, if adopted by a bureau, are implemented through individual bureau directive systems.”

BLM adopts NWCG standards, or implements additional standards, by issuing guidance through the Bureau directives system.

Incident Qualification and Certification

The Agency Administrator (or delegate) is responsible for annual certification of all agency and Administratively Determined (AD) personnel serving on wildfire, prescribed fire, and all hazard incidents. This responsibility includes monitoring medical status, fitness, training, performance, and ensuring the responder meets all position performance requirements.

Training, medical screening, and successful completion of the appropriate work capacity test (WCT) must be properly accomplished. All Incident Qualification Cards issued to agency employees, with the exception of Emergency Firefighter (EFF-paid or temporary employees at the FFT2 level), will be printed using the IQCS. Incident Qualification Cards issued to EFF or temporary employees at the FFT2 level may be printed at the local level without use of the IQCS.

Each agency will designate employees at the national, regional/state, and local levels as Fire Qualifications Administrators, who ensure all incident experience, incident training, and position task books for employees within the agency are accurately recorded in the IQCS. All records must be updated annually or modified as changes occur.

BLM employees shall not certify the qualifications of private sector contractors or educational institutions trainees or instructors except where formal agreements are in place. Non-agency firefighters will be certified by state or local fire departments. The BLM will not act as the certifying agency or assist in administrating/sponsoring the WCT for non-agency firefighters.

Work Capacity Test (WCT)/DOI Medical Standards Program (MSP)

The *Wildland Fire Qualifications System Guide* ([PMS 310-1](#)) establishes physical fitness standards for NWCG sanctioned firefighters. These standards are assessed using the WCT. Prior to attempting the WCT, all employees who participate in wildland fire activities requiring a fitness level of arduous must participate in the DOI Medical Standards Program (MSP).

Website: http://www.nifc.gov/medical_standards

BLM National Fire Operations Fitness Challenge

The BLM National Fire Operations Fitness Challenge provides a common system by which BLM firefighters can measure current fitness, establish fitness goals, track fitness improvement, and receive recognition for their efforts. The Fitness Challenge encourages and recognizes achievement in physical fitness by BLM firefighters. The Fitness Challenge is voluntary; however, BLM firefighters are encouraged to participate.

The Fitness Challenge tests participants in four basic exercises: push-ups, pull-ups, sit-ups and a timed run of either 1.5 or 3.0 miles. Test results are compiled into a final overall score. Unit and state offices are encouraged to support and recognize achievement in firefighter fitness. The BLM FA Division of Fire Operations will recognize high achievers annually.

Website: http://www.blm.gov/nifc/st/en/prog/fire/fireops/fitness_challenge.html

Incident Qualifications and Certification System (IQCS)

The Incident Qualifications and Certification System (IQCS) is the fire qualifications and certification record keeping system for the BLM. The Responder Master Record report provided by the IQCS meets the BLM requirement for maintaining fire qualification records. The system is designed to provide managers at the local, state/regional, and national levels with detailed qualification, experience, and training information needed to certify employees in wildland fire positions. The IQCS is a tool to assist managers in certification decisions. However, it does not replace the manager's responsibility to validate that employees meet all requirements for position performance based on the BLM standards.

A hard copy file folder will be kept for each employee. The contents will include, but are not limited to, training records for all agency required courses, evaluations from assignments, position task book verification, yearly updated IQCS forms, and Responder Master Record (RPTC028) from IQCS. All records will be stored and/or destroyed in accordance with agency policy located at

http://www.blm.gov/wo/st/en/info/regulations/combined_record_schedules.html.

Employees are ultimately responsible for maintaining original training certificates, completed position task books, experience records, and any other qualifications records that may be needed to support training and qualifications.

IQCS Training

All authorized users will attend mandatory IQCS user training prior to accessing the system. System users can receive training in a two ways: classroom and one-on-one training. Geographic

1 Area Training Representatives (GATRs) provide opportunities for formal IQCS training based
2 on annual need. The IQCS staff updates training materials to match modifications and
3 improvements to IQCS.

4
5 *Website:* <http://iqcs.nwcg.gov/>

6 **Incident Qualification Card (Red Card) Review Committees (IQCRC)**

7 Each unit with fire management responsibilities will establish an Incident Qualification Card
8 qualification and certification process, which may include a qualification and certification
9 committee. In areas cooperating with other federal, state, or local agencies, an interagency
10 qualification and certification committee should be established and include representatives from
11 each unit. These qualification and certification committees provide management oversight and
12 review of the wildland and prescribed fire positions under their jurisdiction. The committee:

- 13 • Ensures that qualifications generated by IQCS or other agency systems for employees are
14 valid by reviewing the training and experience of each employee.
- 15 • Determines whether each employee possesses the personal characteristics necessary to
16 perform the wildland and prescribed fire positions in a safe and efficient manner.
- 17 • Makes recommendations to the appropriate Agency Administrator or designee who is
18 responsible for final certification signature.
- 19 • Develops interagency training needs and sponsors courses that can be offered locally.
- 20 • Ensures training nominees meet minimum requirements for attending courses.

21 **Position Task Books**

22 The unit's certifying official is responsible for certification and verification of all employees'
23 qualifications to ensure they meet BLM standards including required training and completion of
24 position task books (PTBs).

25 For more information on roles and responsibilities for completing the PTBs refer to PMS 310-1.

26 To delete a position task book in IQCS contact the IQCS help desk
27 (<http://iqcs.nwcg.gov/main/helpDesk.html>). The request will be forwarded to the BLM IQCS
28 Change Management Board representative for approval.

BLM Recertification Policy

If an employee (including an agency-sponsored AD) has lost currency in a position, the employee is converted to trainee status for that position. In order to regain full qualification for the position, the employee must demonstrate the ability to perform in the position as determined by the Certifying Official. Prior to recertification, the employee must:

- Complete the BLM Recertification Evaluation found in [Appendix B](#).
- Complete one or more evaluation assignments.
- Complete any additional requirements as determined by the Certifying Official (e.g. additional assignments and/or courses).

NOTE: This policy only applies to positions for which a PTB is required.

Website: http://www.blm.gov/nifc/st/en/prog/fire/training/fire_training/recertification.html

BLM-Specific Requirements in the Recruitment and Selection Process

Personnel hired by the BLM must meet requirements established in the position description. If the position description requires Incident Command System qualifications, only qualifications and minimum requirements specified in the NWCG Wildland Fire Qualifications Systems Guide, [PMS 310-1](#) will be applied as selective factors and/or screen-out questions. To avoid reducing candidate pools, BLM-specific requirements that are supplemental to the [PMS 310-1](#) may not be used as selective placement factors/screen-out questions. Supplemental BLM-specific training or qualification requirements may only be used as selective factors and/or screen-out questions when requested and justified by the selecting official, and approved by human resources. Impacts to the candidate pool must be addressed in the justification. As with all other BLM or DOI-specific training/experience requirements (e.g., Do What's Right training and purchase card training) that newly hired employees from other agencies may not have, the supervisor and IQCS certifying official are responsible for reconciling that employee's training and IQCS record after the employee has entered on duty. This may be accomplished by providing additional training/experience or by manually awarding competencies as per established IQCS protocol.

BLM-Specific Incident Qualifications and Organizational Fire Positions

In addition to the [PMS 310-1](#), the BLM has established additional positions to support the fire program such as Prescribed Fire Burn Boss 3 (RXB3), Engine Operator (ENOP), Chainsaw Operators and Fallers. The BLM has also established additional training requirements for some ICS and wildland fire management skill positions. See [Appendix C](#) for specific BLM positions and additional training requirements.

To request changes to current positions and/or their requirements or request new positions or training courses, refer to [Appendix A](#) – BLM Training Committee Request for Change.

Engine Fireline Qualifications

- [Engine Boss](#)
- [Engine Operator](#) (ENOP)
- [Engine Crewmember](#)

Aviation Qualifications

- [Helicopter Cargo Letdown Spotter](#) (HCLS)
- [Helicopter Cargo Letdown Check Spotter](#) (HCCS)
- [Fixed Wing Base Manager](#) (FWBM)
- [Airtanker Base Manager](#) (ATBM)

Prescribed Fire Qualifications

- [Prescribed Fire Burn Boss Type 1](#) (RXB1)
- [Prescribed Fire Burn Boss Type 2](#) (RXB2)
- [Prescribed Fire Burn Boss Type 3](#) (RXB3)
- [Firing Leader](#) (FIRL)
- [Firing Boss](#) (FIRB)
- [Fire Effect Monitor](#) (FEMO)

Other Fire Qualifications

- [Chainsaw Operators and Fallers](#) (FALA, FALB, FALC)
- [Dozer Operator](#)
- [ATV/UTV Operator](#) (ATVO)
- [Driver Training for Regular Drivers of Fire Equipment](#)
- [Visit to the Fireline](#)

General BLM Non-fire Training Requirements

All fire personnel will meet specific agency training, experience, and qualification requirements for incident assignments. Additional training which is deemed necessary to improve employee proficiency and safety but is not addressed within the NWCG curriculum will be offered to the employee and taken in a timely manner. See [Appendix D](#) for more information.

1

(This page intentionally left blank.)

Appendix A

BLM Fire Training Committee Request for Change Process

All Requests for Change forms will be submitted through the appropriate State BLM Fire Training Committee (BFTC) Representative. The Request for Change process is used to recommend:

- Changes to or creation of BLM training courses;
- Changes to or creation of BLM position qualifications including IQCS recommendations;
- Changes to BLM training policy; or
- Development of new training products or workforce development programs.

When the BFTC representative receives a request for change, he/she is expected to seek input from their state prior to submitting the request to the BFTC to ensure the change request is national in scope and meets an identified need of the agency. If so, BFTC representatives will forward to the co-chairs for placement on the agenda.

All requests for change will be processed through BFTC conference calls or meetings and tracked through the BFTC Action Item Log. Some decisions may require coordination with other BLM committees and/or groups.

Once a decision has been reached, the BFTC will forward the request to the Fire Operations Group (FOG) for concurrence. The FA-324 BFTC co-chair will inform the BFTC of final decisions and if any further action(s) is needed.

Changes adopted through this process will be incorporated into the *BLM Standards for Fire Training and Workforce Development* during the annual revision.

Form Instructions:

1. **State/Office Requesting Change:** Indicate the State requesting the change and identify the appropriate BFTC state representative.
2. **Unit Representative Contact Information:** Provide the name, home unit, telephone number, and email address of the person initiating the change request.
3. **Description of the Proposal:** Briefly describe the proposed change in sufficient detail.
4. **Description of the Issue:** Describe the issue your proposal is intended to solve. Provide the significant background information on the issue.
5. **Desired Outcome:** Provide a description of the final product. Offer suggested language for policy change, if applicable.
6. **Estimated Cost/Workload Required:** Provide an estimated amount the proposal will cost to accomplish. Estimate the number of people and time it will take to bring the request to resolution. Offer alternatives for delivering the desired outcome. Understand that this is a simple estimate of workload.

5. Desired Outcome (Describe potential end product, proposed language, estimated due date, etc.)
6. Estimated Cost/Workload Required
7. ~For Committee Use Only~ Tracking #: BLMTC- Training Committee Approval: <input type="checkbox"/> Yes <input type="checkbox"/> No Date: <input type="checkbox"/> Pending/Further Information Needed

Appendix B BLM Recertification Evaluation

BLM Recertification Evaluation

This document is used to determine the agency's minimum requirements for position recertification.

Trainee name:	Unit ID:
Trainee's supervisor:	Trainee's phone number:
Position to be recertified:	Date of last assignment:

Certifying Official: In addition to the mandatory evaluation assignment, the Certifying Official may request additional training or coursework. If the Certifying Official chooses to have the trainee complete a new position task book (PTB), then the recertification evaluation form is unnecessary.

- Mandatory** - Satisfactory performance on at least one evaluation assignment by a qualified evaluator. The evaluation assignment should be documented on the Incident Performance Evaluation form, NFES 1576 (ICS 225).

Check the box next to any optional requirements the trainee needs to perform prior to being considered for recertification (work with the local Qualification and Certification Committee and refer to PMS 310-1):

- Open and complete all tasks in the current PTB as outlined by the local Qualification and Certification Committee. (Note: The trainee will not need to complete the evaluation assignment if the Certifying Official chooses to have the trainee complete a PTB.)
- Complete any new "required training" courses based on the current PMS 310-1 or agency policies that have been added to the position since losing currency.
- Retake all "required training" relevant to the position based on current agency policies.
- Attend the following course(s) prior to certification: _____

Trainee Signature Date

Certifying Official Signature Date

Final Agency Certification

I certify that (trainee name) _____ has met all requirements for recertification in the above position and qualification has been reissued.

Certifying Official – Signature of Approval Date

Evaluator: The above individual has lost currency for the stated position. The trainee's Certifying Official is asking the evaluator to assess the individual's skills and abilities to assist them in determining if the trainee should be considered for recertification.

Assignment Information:

Incident name:	Incident number:
Dates of evaluation:	Incident complexity:
Evaluator qualification:	Fuel type:

What, if any, significant job tasks, competencies, or behaviors were you unable to evaluate on this assignment?

Provide additional comments related to the individual's ability to perform the position.

Do you recommend the individual for recertification?

If no, what recommendation do you have for improving tasks, competencies, and/or behaviors (e.g., more experience is needed in logistic support)?

Evaluator (name, home unit, and phone contact) Date

Trainee Signature Date
May 2011 Page 2 of 2

Appendix C BLM-Specific Incident Qualifications and Organizational Fire Positions

As a supplement to the [PMS 310-1](#), the BLM has identified additional positions to support the wildland fire management program such as Engine Boss (ENGB), Engine Operator (ENOP), Prescribed Fire Burn Boss 3 (RXB3), and Chainsaw Operators and Fallers. The BLM has also added some additional training requirements to some of the ICS and wildland fire management skill positions.

Engine Fire Qualifications

BLM has established additional training and qualification requirements for Engine Operator (ENOP) and Engine Boss (ENGB). These additional requirements are listed below and will be enforced in IQCS under the BLM Set ID.

Engine Boss

BLM utilizes the term “Engine Captain” to describe an individual whose position description reflects primary responsibility as a supervisory wildland firefighter of a wildland fire engine in a BLM fire management organization and should not be confused with Engine Boss. “Engine Captain” is not a fireline qualification. The BLM-specific Engine Boss qualification uses the NWCG position task book; however, training requirements differ.

Required Training

Basic ICS (I-200)
NIMS: An Introduction (IS-700)
Initial Attack Incident Commander (S-200)
Fire Operations in the Wildland/Urban Interface (S-215)
Crew Boss (Single Resource) (S-230)
Intermediate Wildland Fire Behavior (S-290)
BLM Engine Driver Refresher (annually; IQCS Number: RT-301)

Additional Training Which Supports Development of Knowledge and Skills

None

Required Experience

Satisfactory performance as Incident Commander Type 5 (ICT5)
+
Satisfactory performance as Engine Operator (ENOP)
+
Satisfactory performance as Engine Boss (ENGB)

Physical Fitness Level

Annual Fireline Safety Refresher (RT-130)

Physical Fitness Level

Arduous

BLM Engine Training Courses

PMS-418 Engine Operator (IQCS #N9018)

Engine Operator training is intended to provide employees filling the Engine Operator (ENOP) position on engine modules with the knowledge, skills, and abilities they need to safely and effectively utilize engines in the wildland fire environment with a minimum of down time. The course provides a solid foundation of information and hands-on training upon which to build strong job skills for the ENOP's day-to-day activities. Furthermore, on-the-job-training and locally-specific training will be needed to fully equip Engine Operators with the skills required to perform their jobs safely and proficiently.

Website:

http://www.blm.gov/nifc/st/en/prog/fire/training/fire_training/projects/engine_training/enop.html

BL-300 Engine Driver Orientation (IQCS # BL-300)

The goal of the Engine Driver Orientation course is to provide all personnel with the foundation of knowledge to make sound decisions and maintain situational awareness while operating and working around engines so that everyone comes home safely.

This training is the first part of a process to train and educate entry-level and first-year BLM engine crewmembers to drive or move an engine in an emergency situation or around the parking

lot of a governmental site. For engines not covered by the Commercial Driver's License (CDL) requirements, this could also mean running for parts in town, driving the engine in fire camp (fueling or getting supplies), and repositioning the engine on the fireline. For engines covered by CDL requirements, the driver would need a CDL training/learner permit, and a qualified CDL passenger in the cab for any non-emergency driving.

http://www.blm.gov/nifc/st/en/prog/fire/training/fire_training/projects/engine_training/orientation.html

RT-301 BLM Engine Driver Refresher Training

BLM Engine Driver Refresher Training is an objectives-based training requirement. Refresher training must be done annually for all engine drivers. The training may be provided in any way the local Fire Management Officer chooses as long as all the objectives are met and documented. For convenience, a course titled "Nevada BLM Fire and Aviation Driver Training" was developed and may be used to satisfy the refresher requirement. Supplemental training aids are also available to support the refresher training requirement.

BL-302 650 Hummer Orientation and Driver Training

BL-303 668 Tactical Engine (TATRA) Orientation and Driver Training

These courses are designed to provide a minimum level of knowledge to safely and successfully operate specialized fire suppression vehicle in the 650 or 668 Working Capital Fund (WCF) vehicle class and will fulfill the initial training requirement set in the *Interagency Standards for Fire and Fire Aviation Operations* for a driver. The course will focus mainly on maintenance and inspections of the specialized vehicle chassis, its components, as well as provide basic driving techniques and an understanding of the vehicle performance limits. The course will be specific to the specific vehicle class, either 650 or 668.

Historical Reference for Firing Positions: Over time, several changes have been made to the position that controls ignition/firing/burning operations on wildland fires. The BLM has gone from Ignition Specialist 1 and 2 (RXI1, RXI2) and Firing Boss (FIRB) to just a Firing Boss (FIRB). As of October 3, 2007, the BLM endorses two positions: Firing Boss (FIRB) and Firing Leader (FIRL).

For further information on these changes, refer to FA IM-2010-009 at <http://web.blm.gov/internal/fire/Directives/IM2010/FAIM2010009.pdf> and Attachment 1 at <http://web.blm.gov/internal/fire/Directives/IM2010/FAIM2010009a1.pdf>.

Chainsaw Operators and Fallers

The BLM has established the following minimum qualification and certification process for Chainsaw Operators (Red Card certified as Faller A).

Required Training

Successful completion of Wildland Fire Chain Saws (S-212) including the field exercise or those portions of S-212 appropriate for Faller A duties

Physical Fitness Level

Arduous

PTB Requirement

Faller Class A, B, C (BLM-approved)—Minimum Faller A portion

<http://www.nwccg.gov/pms/taskbook-agency/index.htm>

Certification Process

- Agency Administrator (or delegate) certifies qualifications after verification that training is successfully completed.
- Documentation must be maintained for individuals.
- BLM has established the following minimum qualification and certification process for Chainsaw Operators:
 - The individual tasks required for completion of the “A” position task book and the final certification for the “A” level saw operators must be certified by a qualified “B or C” level saw operator.
 - The individual tasks required for completion of the “B” position task book must be evaluated by a qualified “B” or “C” level operator. The Final Evaluator Verification for “B” level operators must be signed by a “C” level saw operator.
 - The individual tasks required for completion of the “C” position task book must be evaluated by a qualified “C” level operator. The Final Evaluator Verification for “C” level operators must be signed by a state approved “C” level certifier.
 - Each of the states/regions will certify and maintain a list of their current “C” class saw operators who they approve to be “C” class certifiers.
 - The certification of “C” class certifiers will remain the responsibility of the agency administrator or delegate.
 - All fire-related (red carded) saw operation qualifications are maintained through the IQCS system and will have a currency of five years.
 - For non-fire saw operators a five year currency for all levels of chainsaw operators will be maintained by documented field operations.

Dozer Operator

Required Training

Introduction to ICS (I-100)
NIMS: An Introduction (IS-700)
Firefighting Training (S-130)
Human Factors on the Fireline (L-180)
Introduction to Wildland Fire Behavior (S-190)
Annual Fireline Safety Refresher (RT-130)
NIMS: An introduction (IS-700)

Physical Fitness Level

ATV Operator (ATVO)

The BLM policy for fire and non-fire ATV operations is found in BLM Handbook [H-1112-1, Chapter 27, Off Highway Vehicles](#).

Required Training

Introduction to Basic ATV Operation (Prerequisite for all other ATV training)
ATV Safety Institute (ASI) ATV Rider Course
BLM Basic ATV Operator Field Training

Physical Fitness Level

None Required

Additional Performance Requirements

All operators shall be re-evaluated by an ATV trainer every three years. The re-evaluation shall be documented on the ATV/UTV Operator Accountability/Certification Tracking Record located in Appendix A of the BLM Manual Handbook [H-1112-1 Ch. 27](#).

ATV/UTV BLM Instructor Qualifications

Refer to BLM Manual Handbook [H-1112-1 Ch. 27](#) for information on instructor qualifications.

UTV Operator

The BLM policy for fire and non-fire ATV operations is found in BLM Handbook [H-1112-1, Chapter 27, Off Highway Vehicles](#).

Required Training

BLM Introduction to Utility Terrain Vehicle Operation
BLM UTV Field Module, to be instructed by a qualified trainer

Physical Fitness Level

None Required

Additional Performance Requirements

All operators shall be re-evaluated by an ATV trainer every three years. The re-evaluation shall be documented on the ATV/UTV Operator Accountability/Certification Tracking Record located in Appendix A of the BLM Manual Handbook [H-1112-1 Ch. 27](#).

ATV/UTV BLM Instructor Qualifications

Refer to BLM Manual Handbook [H-1112-1 Ch. 27](#) for information on instructor qualifications.

Driver Training for Regular Drivers of Fire Equipment

All regular drivers of non-tactical water tenders, helicopter support vehicles, crew carriers, and fuel tenders must complete training that includes the instructional objectives posted at the BLM Fire Training website at:

http://www.blm.gov/nifc/st/en/prog/fire/training/fire_training/projects/engine_training.html

Visits to the Fireline

Visits (such as media visits or political/administrative tours) to hazardous areas of the fire or areas that pose a fire behavior threat will be managed by meeting the requirements below. For more specific information, see the *Interagency Standards for Fire and Fire Aviation Operations* (Red Book).

Visitors to the Fireline/RX Burns may be “Non-Escorted” or “Escorted” depending on the following requirements:

Non-Escorted Visits

Visitors must have an incident qualification with a minimum physical fitness level of “light” to visit the fireline unescorted.

- Must have adequate communications and radio training.
- Completed the following training:
 - Introduction to Fire Behavior (S-190)
 - Firefighter Training (S-130)
 - Annual Fireline Safety Refresher Training, including fire shelter training.
- Deviation from this requirement must be approved by the IC or Burn Boss.

The law enforcement physical fitness standard is accepted as equivalent to a “light” WCT work category.

Escorted Visits

All non-incident, non-agency, visitors lacking the above training and physical requirements must be escorted while on the fireline.

- Visitors must receive training in the proper use of PPE.
- Requirement for hand tool and water to be determined by escort.
- Visitors must be able to walk in mountainous terrain and be in good physical condition with no known limiting conditions.
- Escorts must be minimally qualified as Single Resource Boss. Any deviation from this requirement must be approved by the IC or Burn Boss.

Appendix D Other BLM Training Requirements

Introduction

As stated in [Chapter 5](#), all fire personnel will meet specific agency training, experience, and qualification requirements for incident assignments. Additional training which is deemed necessary to improve employee proficiency and safety but is not addressed within the NWCG curriculum will be offered to the employee and taken in a timely manner.

- The tables presented on the following pages list most training that BLM employees are required to, or are suggested to, take depending on BLM policy and mission. BLM-specific training and qualifications for fireline and prescribed fire positions is presented in [Appendix C](#). For a complete listing of safety and health training, refer to *BLM Safety and Health for Field Operations* (<http://web.blm.gov/internal/wo-500/directives/dir-hdbk/h1112-2.pdf>)
